10.11 Computation of SGPA and CGPA

The following shall be the procedure to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

- i. The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a candidate in all the courses taken by the candidate in a semester to the sum of the number of credits of all the courses undertaken by the candidate in that semester, i.e.

$$SGPA(S_j) = \frac{\sum(C_i \times G_i)}{\sum C_i}$$

Where C_i is the number of credits of the i^{th} course and G_i is the grade point scored by the student in the i^{th} course in the j^{th} semester.

- ii. The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e.

$$CGPA = \frac{\sum(N_j \times S_j)}{\sum N_j}$$

Where S_j is the SGPA of the j^{th} semester and N_j is the total number of credits in that semester.

- iii. The SGPA and CGPA shall be rounded off to 2 digits after decimal place and shall be reported in the Detail-Grade-Certificate (DGC).
- iv. A merit list will be prepared for the programme and Gold Medal will be awarded to a candidate securing highest CGPA provided the candidate must have passed all the semester examinations in the first attempt and within minimum duration of the programme. In case, when more than one candidate have the same CGPA, then Gold Medal shall be decided on the basis of actual obtained marks in the programme.
