

INDIRA GANDHI UNIVERSITY MEERPUR

Scheme of Examination and Syllabus for Under-Graduate Programme (Subject: Computer Applications)

**Under Multiple Entry-Exit, Internship and CBCS-LOCF in
accordance to NEP-2020 w.e.f. 2024-25 (in phased manner)**

Scheme of Examination for Under-Graduate Program
Under Multiple Entry-Exit, Internship and CBCS-LOCF in accordance to NEP-2020
w.e.f. 2024-25 (in phased manner)
Subject: Computer Applications

1st YEAR: SEMESTER-1									
Applicable Scheme	Course	Course Code	Nomenclature of course	Credits	Hours/Week	Internal marks	External Marks	Total Marks	Exam Duration (in hrs)
Scheme A, B & C	CC-1 MCC-1 4 credits	24 L4.5-CAC-101	Programming with Python	3	3	20	50	70	3
			Practicum (Practical)	1	2	10	20	30	3
Scheme C only	MCC-2 4 credits	24 L4.5-CAC-102	Computer Fundamentals	3	3	20	50	70	3
			Practicum (Practical-MS-Office)	1	2	10	20	30	3
Scheme A, B & D	CC-M1 2 credits	24 L4.5-CAC-103	Mathematical Foundations for Computer Science-I	2	2	15	35	50	3
Scheme A, B, C & D	MDC-1 3 credits	24 L4.5-CAC-104	Fundamentals of Computer Science	3	3	20	50	70	3
Scheme C only	CC-M1 4 credits	From Available CC-M1 of 4 credits as per NEP							
Scheme A, B & C	AEC-1 2 credits	From Available pool of AEC-1 of 2 credits as per NEP							
	SEC-1 3 credits	From Available pool of SEC-1 of 3 credits as per NEP							
	VAC-1 2 credits	From Available pool of VAC-1 of 2 credits as per NEP							

CC: Core Course

MDC: Multidisciplinary Course

SEC: Skill Enhancement Course

CC-M: Minor Course

AEC: Ability Enhancement Course

VAC: Value Added Course

Note: Student may also opt DSE/SEC/VAC courses from SWAYAM/NPTEL/MOOC, or any other online courses recognized by UGC.

Scheme of Examination for Under-Graduate Program
Under Multiple Entry-Exit, Internship and CBCS-LOCF in accordance to NEP-2020
w.e.f. 2024-25 (in phased manner)
Subject: Computer Applications

1st YEAR: SEMESTER-II									
Applicable Scheme	Course	Course Code	Nomenclature of Course	Credits	Hours/Week	Internal marks	External Marks	Total Marks	Exam Duration
Scheme A, B & C	CC-2 MCC-3 4 credits	24 L4.5-CAC-201	Object Oriented Programming using C++	3	3	20	50	70	3
			Practicum (Practical)	1	2	10	20	30	3
Scheme C only	DSEC-1 4 credits	24 L4.5-CAC-202	Database Management Systems	3	3	20	50	70	3
			Practicum (Practical)	1	2	10	20	30	3
Scheme A, B & D	CC-M2 2 credits	24 L4.5-CAC-203	Mathematical Foundations for Computer Science-II	2	2	15	35	50	3
Scheme A, B, C & D	MDC-2 3 credits	24 L4.5-CAC-204	Web Technologies Fundamentals	3	3	20	50	70	3
Scheme A, B, & C	Internship* 4 credits	24 L4.5-CAC-205	*Internship of 4 credits of 4-6 weeks duration						
Scheme C only	CC-M2 4 credits	From Available CC-M2 of 4 credits as per NEP							
Scheme A, B & C	AEC-2 2 credits	From Available pool of AEC-2 of 2 credits as per NEP							
	SEC-2 3 credits	From Available pool of SEC-2 of 3 credits as per NEP							
	VAC-2 2 credits	From Available pool of VAC-2 of 2 credits as per NEP							

CC: Core Course

MDC: Multidisciplinary Course

SEC: Skill Enhancement Course

DSEC: Discipline Skill Enhancement Course

CC-M: Minor Course

AEC: Ability Enhancement Course

VAC: Value Added Course

***Applicable for those students who wish to exit after 2nd semester**

Note: Student may also opt DSE/SEC/VAC courses from SWAYAM/NPTEL/MOOC, or any other online courses recognized by UGC.

Note: UG Certificate in Computer Applications (with 48 Credits) will be provided, if student want to exit after 2nd Semester, on submitting 4-6 weeks Internship Report (4 Credits).

Scheme of Examination for Under-Graduate Program
Under Multiple Entry-Exit, Internship and CBCS-LOCF in accordance to NEP-2020
w.e.f. 2024-25 (in phased manner)
Subject: Computer Applications

2nd YEAR: SEMESTER-III									
Applicable Scheme	Course	Course Code	Nomenclature of Course	Credits	Hours/Week	Internal marks	External Marks	Total Marks	Exam Duration
Scheme A, B & C	CC-3 MCC-4 4 credits	24 L5.0-CAC-301	Data Structures and Applications	3	3	20	50	70	3
			Practicum (Practical)	1	2	10	20	30	3
Scheme B only	MCC-2 4 credits	24 L5.0-CAC-102	Computer Fundamentals	3	3	20	50	70	3
			Practicum (Practical-MS-Office)	1	2	10	20	30	3
Scheme B & C	MCC-5 4 credits	24 L5.0-CAC-302	Concept of Operating Systems	4	4	30	70	100	3
Scheme A, B, C & D	MDC-3 3 credits	24 L5.0-CAC-303	Programming with C	3	3	20	50	70	3
Scheme A & C	CC-M3 4 credits	From Available CC-M3 of 4 credits as per NEP							
Scheme B only	CC-M3(V) 4 credits	From Available pool of VOC-1 of 4 credits as per NEP							
Scheme A, B & C	AEC-3 2 credits	From Available pool of AEC-3 of 2 credits as per NEP							
	SEC-3 3 credits	From Available pool of SEC-3 of 3 credits as per NEP							
Scheme C only	VAC-3 2 credits	From Available pool of VAC-3 of 2 credits as per NEP							

CC: Core Course

MDC: Multidisciplinary Course

SEC: Skill Enhancement Course

CC-M: Minor (Vocational)

AEC: Ability Enhancement Course

VAC: Value Added Course

Note: Student may also opt DSE/SEC/VAC courses from SWAYAM/NPTEL/MOOC, or any other online courses recognized by UGC.

Scheme of Examination for Under-Graduate Program
Under Multiple Entry-Exit, Internship and CBCS-LOCF in accordance to NEP-2020
w.e.f. 2024-25 (in phased manner)
Subject: Computer Applications

2nd YEAR: SEMESTER-IV									
Applicable Scheme	Course	Course Code	Nomenclature of Course	Credits	Hours / Week	Interna lmarks	Externa lMarks	Total Mark s	Exam Duratio n
Scheme A, B & C	CC-4 MCC-6 4 credits	24 L5.0-CAC-401	Java OOP Foundations	3	3	20	50	70	3
			Practicum (Practical)	1	2	10	20	30	3
Scheme B & C	MCC-7 4 credits	24 L5.0-CAC-402	Management Information System	4	4	30	70	100	3
Scheme B & C	MCC-8 4 credits	24 L5.0-CAC-403	Computer Graphics	3	3	20	50	70	3
			Practicum (Practical)	1	2	10	20	30	3
Scheme B & C	DSE-1 4 credits (Select any one)	24 L5.0-CAC-404	Data Communication and Networking	4	4	30	70	100	3
		24 L5.0-CAC-405	Logical Organization of Computer	4	4	30	70	100	3
Scheme A, B & C	Internship* (4 credits)	24 L5.0-CAC-406							
Scheme A, B & C	CC-M4 (V) 4 credits	From Available pool of CC-M4(V) of 4 credits as per NEP							
	AEC-4 2 credits	From Available pool of AEC-3 of 2 credits as per NEP							
Scheme Only	VAC-4 2 credits	From Available pool of VAC-4 of 2 credits as per NEP							
Scheme A & B	VAC-3 2 credits	From Available pool of VAC-3 of 2 credits as per NEP							
*Internship of 4 credits of 4-6 weeks duration for students who wish to exit after 4th semester									

CC: Core Course
MDC: Multidisciplinary Course
SEC: Skill Enhancement Course
DSE: Discipline Specific Elective course

CC-M(V): Minor (Vocational)
AEC: Ability Enhancement Course
VAC: Value Added Course

Note: Student may also opt DSE/SEC/VAC courses from SWAYAM/NPTEL/MOOC or any other online courses recognized by UGC.

Note: UG Diploma in Computer Applications (with 94 Credits) will be provided, if student want to exit after 4th Semester on submitting the 4-6 weeks Internship Report (4 Credits).

**Scheme of Examination for Under-Graduate Program
Under Multiple Entry-Exit, Internship and CBCS-LOCF in accordance to NEP-2020
w.e.f. 2024-25 (in phased manner)
Subject: Computer Applications**

3rd YEAR: SEMESTER-V									
Applicable Scheme	Course	Course Code	Nomenclature of Course	Credits	Hours/Week	Internal marks	External Marks	Total Marks	Exam Duration
Scheme A, B & C	CC-5 MCC-9 4 credits	24 L5.5-CAC-501	Artificial Intelligence	4	4	30	70	100	3
Scheme B & C	MCC-10 4 credits	24 L5.5-CAC-502	Data Analytics using Spreadsheets	3	3	20	50	70	3
			Practicum (Practical)	1	2	10	20	30	3
Scheme B & C	DSE-2 4 credits Select one Option	24 L5.5-CAC-503	Linux and Shell programming	3	3	20	50	70	3
			Practicum (Practical)	1	2	10	20	30	3
		24 L5.5-CAC-504	Web Development	3	3	20	50	70	3
			Practicum (Practical)	1	2	10	20	30	3
Scheme B & C	DSE-3 4 credits Select one Option	24 L5.5-CAC-505	Mobile Application Development	4	4	30	70	100	3
		24 L5.5-CAC-506	Multimedia Technology	4	4	30	70	100	3
Scheme A, B & C	Internship* 4 credits	24 L5.5-CAC-507	If not done in II and IV semester						
Scheme A & C	CC-M5 (V) 4 credits	From Available pool of VOC-1 of 4 credits as per NEP							

CC: Core Course

MDC: Multidisciplinary Course

SEC: Skill Enhancement Course

DSE: Discipline Skill Elective Course

Note: Student may also opt DSE/SEC/VAC courses from SWAYAM/NPTEL/MOOC or any other online courses recognized by UGC.

CC-M (V) : Minor (Vocational)

AEC: Ability Enhancement Course

VAC: Value Added Course

Scheme of Examination for Under-Graduate Program
Under Multiple Entry-Exit, Internship and CBCS-LOCF in accordance to NEP-2020
w.e.f. 2024-25 (in phased manner)
Subject: Computer Applications

3rd YEAR: SEMESTER-VI									
Applicable Scheme	Course	Course Code	Nomenclature of Paper	Credits	Hours/Week	Internal marks	External Marks	Total Marks	Exam Duration
Scheme A, B & C	CC-6 MCC-11 4 credits	24L5.5 -CAC-601	Programming in R	3	3	20	50	70	3

	Project/ Dissertation 12 credits	24 L6.0-CAC-808	Project/Dissertation	8+4				300	
	CC-HM2 4 credits	From Available Minor of 4 credits as per NEP							

CC: Core Course

CC-HM: Minor

PC: Practicum Course

Note: Bachelor (Hons.) Degree in Computer Applications with 184 credits will be awarded.

Note: Bachelor (Hons.) Degree (With Research) in Computer Applications with 184 credits will be awarded.

Note: Student may also opt DSE/SEC/VAC courses from SWAYAM/NPTEL/MOOC or any other online courses recognized by UGC

SEMESTER-1

INDIRA GANDHI UNIVERSITY, MEERPUR, REWARI

Session:2024-25			
Part A- Introduction			
Subject	Computer Applications		
Semester	I		
Name of the Course	Programming with Python		
Course Code	24 L4.5-CAC-101		
Course Type:(CC/MCC/MDC/CC-M/DSEC/VOC/DSE/PC/AEC/VAC)	CC-1 (Core Course)		
Level of the course (As per Annexure-I)	100-199		
Pre-requisite for the course (if any)			
Course Learning Outcomes (CLO):	After completing this course, the learner will be able to: 1. Write simple programs using built-in data structures in Python. 2. Implement arrays and user defined functions in Python. 3. Solve problems in the respective domain using suitable programming constructs in Python. 4. Solve problems in the respective domain using the concepts of object-oriented programming in Python. 5*. to implement the programs based on various concepts of Python.		
Credits	Theory	Practicum	Total
	3	1	4
Contact Hours	3	2	5
Max. Marks:100(70(T)+30(P)) Internal Assessment Marks:30(20(T)+10(P)) End Term Exam Marks:70(50(T)+20(P))		Time: 3 Hrs.(T), 3Hrs.(P)	
Part B- Contents of the Course			

Instructions for Paper- Setter

Examiner will set a total of nine questions. Out of which first question will be compulsory. Remaining eight questions will be set from four unit selecting two questions from each unit. Examination will be of three-hour duration. All questions will carry equal marks. First question will comprise of short answer type questions covering entire syllabus. Candidate will have to attempt five questions in all, selecting one question from each unit. First question will be compulsory. Practicum will be evaluated by an external and an internal examiner. Examination will be of three-hour duration.

Unit	Topics	Contact Hours
I	Introduction to Programming: Problem solving strategies; Structure of a Python program; Syntax and semantics; Executing simple programs in Python.	5
II	Creating Python Programs: Identifiers and keywords; Literals, numbers, and strings; Operators; Expressions; Input/output statements; Defining functions; Control structures (conditional statements, loop control statements, break, continue and pass, exit function), default arguments.	13
III	Built-in data structures: Mutable and immutable objects; Strings, built-in functions for string, string traversal, string operators and operations; Lists creation, traversal, slicing and splitting operations, passing list to a function; Tuples, sets, dictionaries and their operations.	14
IV	File and exception handling: File handling through libraries; Errors and exception handling.	8
V*	<p>Practicum:</p> <p>Students are advised to do laboratory/practical practice not limited to, but including the following types of problems:</p> <ul style="list-style-type: none">• WAP to find the roots of a quadratic equation.• WAP to accept a number 'n' and (a). Check if 'n' is prime (b). Generate all prime numbers till 'n' (c). Generate first 'n' prime numbers (d). This program may be done using functions.• WAP that accepts a character and performs the following: (a). print whether the character is a letter or numeric digit or a special character (b). if the character is a letter, print whether the letter is uppercase or lowercase (c). if the character is a numeric digit, prints its name in text (e.g., if input is 9, output is NINE)• WAP to perform the following operations on a string (a). Find the frequency of a character in a string. (b). Replace a character by another character in a string. (c). Remove the first occurrence of a character from a string. (d). Remove all occurrences of a character from a string.• WAP to swap the first n characters of two strings.• Write a function that accepts two strings and returns the indices of all the occurrences of the second string in the first string as a list. If the second string is not present in the first string, then it should return -1.• WAP to create a list of the cubes of only the even integers appearing in the input list (may have elements of other types 25 9 also) using the following: (a). 'for' loop (b). list comprehension• WAP to read a file and (a). Print the total number of characters,	25

	<p>words and lines in the file. (b). Calculate the frequency of each character in the file. Use a variable of dictionary type to maintain the count. (c). Print the words in reverse order. (d). Copy even lines of the file to a file named 'File1' and odd lines to another file named 'File2'.</p> <ul style="list-style-type: none"> • Write a function that prints a dictionary where the keys are numbers between 1 and 5 and the values are cubes of the keys. • Consider a tuple t1= (1, 2, 5, 7, 9, 2, 4, 6, 8, 10). WAP to perform following operations: (a). Print half the values of the tuple in one line and the other half in the next line. (b). Print another tuple whose values are even numbers in the given tuple. (c). Concatenate a tuple t2= (11,13,15) with t1. (d). Return maximum and minimum value from this tuple. • WAP to accept a name from a user. Raise and handle appropriate exception(s) if the text entered by the user contains digits and/or special characters. 	
Suggested Evaluation Methods		
	<p>Internal Assessment:</p> <ul style="list-style-type: none"> ➤ Theory <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/presentation/assignment/quiz/class test etc.: 5 • Mid-Term Exam: 10 ➤ Practicum <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/Demonstration/Viva-voce/Lab records etc.: 5 • Mid-Term Exam: NA 	<p>End Term Examination: A three-hour exam for both theory and practicum.</p>
Part C- Learning Resources		
<p>Recommended Books/e-resources/LMS:</p> <ul style="list-style-type: none"> • Taneja, S., Kumar, N., Python Programming- A Modular Approach, Pearson Education India, 2018. • Balaguruswamy E., Introduction to Computing and Problem Solving using Python, 2nd edition, McGraw Hill Education, 2018. • Brown, Martin C., Python: The Complete Reference, 2nd edition, McGraw Hill Education, 2018. • Guttag, J.V. Introduction to computation and programming using Python, 2 nd edition, MIT Press, 2016 		

*Applicable for courses having practical component.

Course Type:(CC/MCC/MDC/CC-M/DSEC/VOC/DSE/PC/AEC/VAC)	MCC-2		
Level of the course (As per Annexure-I)	100-199		
Pre-requisite for the course (if any)			
Course Learning Outcomes (CLO):	After completing this course, the learner will be able to: <ol style="list-style-type: none"> 1. understand the basics of computer 2. learn about I/O devices and operating systems 3. understand internet and its services 4. learn about the threats and security concepts on computers <hr/> 5*. to understand the working of operating system, internet and security related concepts.		
Credits	Theory	Practicum	Total
	3	1	4
Contact Hours	3	2	5
Max. Marks:100(70(T)+30(P))		Time: 3 Hrs.(T), 3Hrs.(P)	
Internal Assessment Marks:30(20(T)+10(P))			
End Term Exam Marks:70(50(T)+20(P))			
Part B- Contents of the Course			
<u>Instructions for Paper- Setter</u>			
Examiner will set a total of nine questions. Out of which first question will be compulsory. Remaining eight questions will be set from four unit selecting two questions from each unit. Examination will be of three-hour duration. All questions will carry equal marks. First question will comprise of short answer type questions covering entire syllabus. Candidate will have to attempt five questions in all, selecting one question from each unit. First question will be compulsory. Practicum will be evaluated by an external and an internal examiner. Examination will be of three-hour duration.			

Unit	Topics	Contact Hours
I	<p>Computer Fundamentals: Evolution of Computers through generations, Characteristics of Computers, Strengths and Limitations of Computers, Classification of Computers, Functional Components of a Computer System, Applications of computers in Various Fields. Types of Software: System software, Application software, Utility Software, Shareware, Freeware, Firmware, Free Software.</p> <p>Memory Systems: Concept of bit, byte, word, nibble, storage locations and addresses, measuring units of storage capacity, access time, concept of memory hierarchy. Primary Memory - RAM, ROM, PROM, EPROM. Secondary Memory - Types of storage devices, Magnetic Tape, Hard Disk, Optical Disk, Flash Memory.</p>	10
II	<p>I/O Devices: I/O Ports of a Desk Top Computer, Device Controller, Device Driver. Input Devices: classification and use, keyboard, pointing devices - mouse, touch pad and track ball, joystick, magnetic stripes, scanner, digital camera, and microphone Output Devices: speaker, monitor, printers: classification, laser, ink jet, dot-matrix. Plotter.</p> <p>Introduction to Operating System: Definition, Functions, Features of Operating System, Icon, Folder, File, Start Button, Task Bar, Status Buttons, Folders, Shortcuts, Recycle Bin, Desktop, My Computer, My Documents, Windows Explorer, Control Panel.</p>	10
III	<p>The Internet: Introduction to networks and internet, history, Internet, Intranet & Extranet, Working of Internet, Modes of Connecting to Internet.</p> <p>Electronic Mail: Introduction, advantages and disadvantages, User Ids, Passwords, e-mail addresses, message components, message composition, mailer features. Browsers and search engines.</p>	10
IV	<p>Threats: Physical & non-physical threats, Virus, Worm, Trojan, Spyware, Keyloggers, Rootkits, Adware, Cookies, Phishing, Hacking, Cracking.</p> <p>Computer Security Fundamentals: Confidentiality, Integrity, Authentication, Non-Repudiation, Security Mechanisms, Security Awareness, Security Policy, anti-virus software & Firewalls, backup & recovery.</p>	10
V*	<p>Practicum: Students are advised to do laboratory/practical practice not limited to, but including the following types of problems: MS-Office:</p> <ul style="list-style-type: none"> • Starting with basics of MS-Office • Understand basics of MS-Word, Excel, Powerpoint <p>Internet and E-mail:</p> <ul style="list-style-type: none"> • Using Internet for various tasks • Creating and using e-mail. Security: • Understanding various threats • How to be safe from virus threats <p>Various software to get safe from virus attacks.</p>	25

Suggested Evaluation Methods	
<p>Internal Assessment:</p> <p>➤ Theory</p> <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/presentation/assignment/quiz/class test etc.: 5 • Mid-Term Exam: 10 <p>➤ Practicum</p> <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/Demonstration/Viva-voce/Lab records etc.: 5 • Mid-Term Exam: NA 	<p>End Term Examination: A three hour exam for both theory and practicum.</p>
Part C-Learning Resources	
<p>Recommended Books/e-resources/LMS:</p> <ul style="list-style-type: none"> • Sinha, P.K. & Sinha, Priti, Computer Fundamentals, BPB. • Dromey, R.G., How to Solve it By Computer, PHI. • Norton, Peter, Introduction to Computer, McGraw-Hill. • Leon, Alexis & Leon, Mathews, Introduction to Computers, Leon Tech World. • Rajaraman, V., Fundamentals of Computers, PHI. 	

*Applicable for courses having practical component.

INDIRA GANDHI UNIVERSITY, MEERPUR, REWARI

Session:2024-25		
Part A-Introduction		
Subject	Computer Applications	
Semester	I	
Name of the Course	Mathematical Foundations for Computer Science-I	
Course Code	24 L4.5-CAC-103	
Course Type:(CC/MCC/MDC/CC-M/DSEC/VOC/DSE/PC/AEC/VAC)	CC-M1(Minor)	
Level of the course (As per Annexure-I)	100-199	
Pre-requisite for the course (if any)		
Course Learning Outcomes (CLO):	After learning this course student will be able: <ol style="list-style-type: none"> 1. Gain the knowledge of set theory, types of sets and operations on sets. Understand various concepts of matrices and determinants and acquire the cognitive skills to apply different operations on matrices and determinants. 2. Have the knowledge of the basic concepts of complex numbers and acquire skills to solve linear quadratic equations. 3. Understand the concept of differentiation. 4. * Attain the skills to make use of the learnt concepts of Introductory Mathematics in multidisciplinary learning contexts and to know their applications 	
Credits	Theory	Total
	2	2
Contact Hours	2	2
Max. Marks:50(35(T)+15(IA)) Internal Assessment Marks:15 End Term Exam Marks:35		Time: 3 Hrs.(T)
Part B-Contents of the Course		
<u>Instructions for Paper- Setter</u>		
Examiner will set a total of nine questions. Out of which first question will be compulsory. Remaining eight questions will be set from four unit selecting two questions from each unit. Examination will be of three-hour duration. All questions will carry equal marks. First question will comprise of short answer type questions covering entire syllabus.		

Candidate will have to attempt five questions in all, selecting one question from each unit. First question will be compulsory. Examination will be of three-hour duration.

Unit	Topics	Contact Hours
I	<p>Sets: Sets, Subsets, Equal Sets Universal Sets, Finite and Infinite Sets, Operation on Sets, Union, Intersection and Complements of Sets, Cartesian Product, Cardinality of Set, Practical applications of set theory.</p> <p>Relations And Functions: Properties of Relations, Equivalence Relation, Partial Order Relation. Function: Domain and Range, Onto, Into and One to One Functions, Composite and Inverse Functions.</p>	7
II	<p>Trigonometry: Introduction, Measurement of angles, trigonometric functions, relation between trigonometric functions, signs of trigonometric functions, trigonometric functions of standard angles. Basic of inverse trigonometry.</p> <p>Limits & Continuity: Limit at a Point, properties of limit, computation of limits of various types of functions, Continuity of a function at a point, Continuity over an interval.</p>	8
III	<p>Differentiation: Derivative of a function, Derivatives of sum, differences, product & quotient of functions, Derivatives of polynomial, trigonometric, exponential, logarithmic, inverse trigonometric and implicit functions, Logarithmic Differentiation, Chain rule and differentiation by substitution.</p>	7
IV	<p>Matrices: Definition, Types of Matrices, Addition, Subtraction, Scalar Multiplication and Multiplication of Matrices.</p> <p>Determinants: Definition, Minors, Cofactors, Properties of Determinants, Applications of determinants in finding area of triangle, Adjoint of matrix, Inverse of matrix, solving a system of linear equations using matrix method.</p>	8

Suggested Evaluation Methods

Internal Assessment:

➤ **Theory**

- Class Participation: 5
- Seminar/presentation/assignment/quiz/class test etc.: 5
- Mid-Term Exam: 5

End Term

Examination: A three-hour exam for theory.

Part C-Learning Resources

Candidate will have to attempt five questions in all, selecting one question from each unit. First question will be compulsory. Examination will be of three-hour duration.		

Unit	Topics	Contact Hours
I	Computer Fundamentals: Evolution of Computers through generations, Characteristics of Computers, Strengths and Limitations of Computers, Classification of Computers, Functional Components of a Computer System, Applications of computers in Various Fields. Types of Software: System software, Application software, Utility Software.	7
II	Memory Systems: Concept of bit, byte, word, nibble, storage locations and addresses, measuring units of storage capacity, access time, concept of memory hierarchy. Primary Memory - RAM, ROM, PROM, EPROM. Secondary Memory - Types of storage devices, Magnetic Tape, Hard Disk, Optical Disk, Flash Memory. I/O Devices: I/O Ports of a Desk Top Computer, Device Controller, Device Driver. Input Devices: classification and use, keyboard, pointing devices - mouse, touch pad and track ball, joystick, magnetic stripes, scanner, digital camera, and microphone Output Devices: speaker, monitor, printers: classification, laser, ink jet, dot-matrix. Plotter.	8
III	Introduction to Operating System: Definition, Functions, Features of Operating System, Icon, Folder, File, Start Button, Task Bar, Status Buttons, Folders, Shortcuts, Recycle Bin, Desktop, My Computer, My Documents, Windows Explorer, Control Panel.	7
IV	The Internet: Introduction to networks and internet, history, Internet, Working of the Internet, Modes of Connecting to Internet. Electronic Mail: Introduction, advantages and disadvantages, User Ids, Passwords, e-mail addresses, message components, message composition, mailer features. Browsers and search engines	8
Suggested Evaluation Methods

Part B- Contents of the Course			
<u>Instructions for Paper- Setter</u>			
<p>Examiner will set a total of nine questions. Out of which first question will be compulsory. Remaining eight questions will be set from four unit selecting two questions from each unit. Examination will be of three-hour duration. All questions will carry equal marks. First question will comprise of short answer type questions covering entire syllabus. Candidate will have to attempt five questions in all, selecting one question from each unit. First question will be compulsory. Practicum will be evaluated by an external and an internal examiner. Examination will be of three-hour duration.</p>			

Unit	Topics	Contact Hours
I	Introduction to C++: About C++, Character Set, Keywords, Identifiers, Constants, Punctuators, Date Types: User Defined, Built-in, Derived Data Types, Access Modifiers. Unformatted and Formatted I/O Operations. I/O using extraction and extraction operators, Type Conversion, Type Casting.	10
II	Operators in C++: Arithmetic, Relational, Logical, Bitwise, Ternary, Precedence & associativity of Operators. Control Structures: if statement, if-else statement, nested if, if-else-if ladder, switch...case statement, break and continue, goto statement, nested switch...case statement, Loops: while loop, do...while loop, for loop.	10
III	Arrays and strings: Array definition, initialization, multidimensional arrays, Manipulation of array elements, String declaration and initialization, Manipulations, String handing functions. Functions: Declaration and Definition, return values, arguments, passing parameters by value, call by reference, call by pointer, Recursions, Inline and external linkage Functions, storage classes.	10
IV	Object-Oriented Features of C++: Class and Objects, Data hiding & encapsulation, abstraction, constructors & destructors. Data Members and Member Functions, accessing class members, empty class, local class, global class, Scope Resolution Operator and its Uses, Static Data Members, Static Member Functions, Structure vs Class.	10
V*	Practicum: Students are advised to do laboratory/practical practice by including following types of problems: <ul style="list-style-type: none"> • Programs for showing use of different operators • Program for array • Program for constructor and destructor • Program for structure. 	25
Suggested Evaluation Methods		
Internal Assessment: ➤ Theory <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/presentation/assignment/quiz/classes test etc.: 5 • Mid-Term Exam: 10 ➤ Practicum <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/Demonstration/Viva-voce/Lab records etc.: 5 • Mid-Term Exam: NA 		End Term Examination: A three-hour exam for both theory and practicum.
Part C-Learning Resources		
Recommended Books/e-resources/LMS: Text Books: <ol style="list-style-type: none"> 1. Herbert Schildt, C++, The Complete Reference, Tata McGraw-Hill 2. Robert Lafore, Object Oriented Programming in C++, SAMS Publishing 		

Reference Books:

1. Bjarne Stroustrup, The C++ Programming Language, Pearson Education
2. Balaguruswami, E., Object Oriented Programming In C++, Tata McGraw-Hill.

End Term Exam Marks:70(50(T)+20(P))			
Part B- Contents of the Course			
<u>Instructions for Paper- Setter</u>			
Examiner will set a total of nine questions. Out of which first question will be compulsory. Remaining eight questions will be set from four unit selecting two questions from each unit. Examination will be of three-hour duration. All questions will carry equal marks. First question will comprise of short answer type questions covering entire syllabus. Candidate will have to attempt five questions in all, selecting one question from each unit. First question will be compulsory. Practicum will be evaluated by an external and an internal examiner. Examination will be of three-hour duration.			

Unit	Topics	Contact Hours
I	Database Management System – Introduction and Purpose, Database Architectures: Centralised, Client-Server, Parallel, Distributed, and Web based system: Web architecture (2 tier, 3 tier, N-tier Architecture) Database Storage Structures: Introduction, Indexing, Hashing, and Data Dictionary.	10
II	Data Models: Introduction to various data models, Cardinality Ratio & Relationships, Representation of entities, attributes, relationship attributes, relationship set, Generalization, aggregation, Structure of relational Database and different types of keys, Codd’s rules and Relational data model	10
III	Relational Database design: Basic System Development Life Cycle, Database Design – ER to Relational, Functional dependencies, Normalization, Normal forms based on primary keys (1NF, 2NF, 3NF)	10
IV	SQL queries: SQL data definition, data types, specifying constraints, Queries for retrieval, insertion, deletion, updation, introduction to views.	10
V*	<p>Practicum:</p> <p>Create and use the following database schema to answer the given queries.</p> <p>EMPLOYEE Schema:</p> <p>Field Type NULL KEY DEFAULT</p> <p>Empno Char(3) NO PRI NIL</p> <p>Ename Varchar(50) NO NIL</p> <p>Job_type Varchar(50) NO NIL</p> <p>Manager Char(3) Yes FK NIL</p> <p>Hire_date Date NO NIL</p> <p>Dno Integer YES FK NIL</p> <p>Commission Decimal(10,2) YES NIL</p> <p>Salary Decimal(7,2) NO NIL</p> <p>DEPARTMENT Schema:</p> <p>Field Type NULL KEY DEFAULT</p> <p>Dno Integer No PRI NULL</p> <p>Dname Varchar(50) Yes NULL</p> <p>Location Varchar(50) Yes New Delhi</p> <p>Query List</p> <ol style="list-style-type: none"> 1. Query to display Employee Name, Job, Hire Date, Employee Number; for each employee with the Employee Number appearing first. 2. Query to display unique Jobs from the Employee Table. 3. Query to display the Employee Name concatenated by a Job separated by a comma. 4. Query to display all the data from the Employee Table. Separate each Column by a comma and name the said column as THE_OUTPUT. 5. Query to display the Employee Name and Salary of all the employees earning more than \$2850. 6. Query to display Employee Name and Department Number for the Employee No= 7900. 7. Query to display Employee Name and Salary for all employees whose salary is not in the range of \$1500 and \$2850. 8. Query to display Employee Name and Department No. of all the employees in Dept 10 and Dept 30 in the alphabetical order by name. 9. Query to display Name and Hire Date of every Employee who was hired in 1981. 10. Query to display Name and Job of all employees who don’t have a 	25

	<p>current Manager.</p> <p>11. Query to display the Name, Salary and Commission for all the employees who earn commission.</p> <p>12. Sort the data in descending order of Salary and Commission.</p> <p>13. Query to display Name of all the employees where the third letter of their name is 'A'.</p> <p>14. Query to display Name of all employees either have two „R“s or have two A's in their name and are either in Dept No = 30 or their Manger's Employee No = 7788.</p> <p>15. Query to display Name, Salary and Commission for all employees whose Commission amount is 14 greater than their Salary increased by 5%.</p> <p>16. Query to display the Current Date.</p> <p>17. Query to display Name, Hire Date and Salary Review Date which is the 1st Monday after six months of employment.</p> <p>18. Query to display Name and calculate the number of months between today and the date each employee was hired.</p> <p>19. Query to display the following for each employee earns < Salary> monthly but wants < 3 * Current Salary >. Label the Column as Dream Salary.</p>

Examination will be of three-hour duration.</p>			

Unit	Topics	Contact Hours
I	Data Structure Definition, Data Type vs. Data Structure, Classification of Data Structures, Data Structure Operations, Applications of Data Structures; Algorithm Specifications: Performance Analysis and Measurement (Time and Space Analysis of Algorithms- Average, Best and Worst Case Analysis), Asymptotic Notations and their use in Algorithm Handling.	10
II	Arrays: Introduction, Linear Arrays, Representation of Linear Array In Memory, Two Dimensional and Multidimensional Arrays, Sparse Matrix and its Representation, Operations on Array: Algorithm for Traversal, Selection, Insertion, Deletion and its implementation. String Handling: Storage of Strings, Operations on Strings viz., Length, Concatenation, Substring, Insertion, Deletion, Replacement, Pattern Matching.	10
III	Linked List: Introduction, Array vs. linked list, Representation of linked lists in Memory, Traversing a Linked List, Insertion, Deletion, Searching into a Linked list, Type of Linked List. Stack: Array Representation of Stack, Linked List Representation of Stack, Algorithms for Push and Pop, Application of Stack: Polish Notation, Postfix Evaluation Algorithms, Infix to Postfix Conversion, Infix to Prefix Conversion, Recursion.	10
IV	Introduction to Queues: Simple Queue, Double Queue, Circular Queue, Priority Queue, Representation of Queues as Linked List and Array, Applications of Queue. Algorithm on Insertion and Deletion in Simple Queue and Circular Queue. Searching and Sorting Techniques, Sorting Techniques: Bubble sort, Merge sort, Selection sort, Quick sort, Insertion Sort. Searching Techniques: Sequential Searching, Binary Searching.	10
V*	The following activities be carried out/ discussed in the lab during the period of the semester. Programming Lab: <ul style="list-style-type: none"> • Program for Array • Program for Linked List • Program for Queue • Sorting programs 	25

Session:2024-25		
Part A-Introduction		
Subject	Computer Applications	
Semester	III	
Name of the Course	Concept of Operating Systems	
Course Code	24 L5.0-CAC-302	
Course Type:(CC/MCC/MDC/CC-M/DSEC/VOC/DSE/PC/AEC/VAC)	MCC-5	
Level of the course (As per Annexure-I)	100-199	
Pre-requisite for the course (if any)	Must have basic knowledge of computer	
Course Learning Outcomes(CLO):	<p>At the end of this course, the student will be able to:</p> <ol style="list-style-type: none"> 1. Understand the basic concepts of operating systems and its services along with process management. 2. Understand concept of process scheduling and acquire knowledge of process synchronization. 3. Learn about memory management and virtual memory concepts. 4. Learn to work with directory structure and security aspects. <p>5*. To implement the programs based on operating systems.</p>	
Credits	Theory	Total
	4	4
Contact Hours	4	4
Max. Marks:100(70(T)+30(IA)) Internal Assessment Marks:30 End Term Exam Marks:70		Time: 3 Hrs.(T)
Part B- Contents of the Course		
<u>Instructions for Paper- Setter</u>		
<p>Examiner will set a total of nine questions. Out of which first question will be compulsory. Remaining eight questions will be set from four unit selecting two questions from each unit. Examination will be of three-hour duration. All questions will carry equal marks. First question will comprise of short answer type questions covering entire syllabus.</p> <p>Candidate will have to attempt five questions in all, selecting one question from each unit. First question will be compulsory. Examination will be of three-hour duration.</p>		

Unit	Topics	Contact Hours
I	Introductory Concepts: Operating System, Functions and Characteristics, Historical Evolution of Operating Systems, Operating System Structure. Types of Operating System: Real time, Multiprogramming, Multiprocessing, Batch processing. Operating System Services, Operating System Interface, Service System Calls, System Programs. Process Management: Process Concepts, Operations on Processes, Process States and Process Control Block. Inter-Process Communication.	16
II	Introductory Concepts: Operating System, Functions and Characteristics, Historical Evolution of Operating Systems, Operating System Structure. Types of Operating System: Real time, Multiprogramming, Multiprocessing, Batch processing. Operating System Services, Operating System Interface, Service System Calls, System Programs. Process Management: Process Concepts, Operations on Processes, Process States and Process Control Block. Inter-Process Communication.	14
III	Memory Management Strategies: Memory Management of Single User and Multiuser Operating System, Partitioning, Swapping, Contiguous Memory Allocation, Paging and Segmentation; Virtual Memory Management: Demand Paging, Page Replacement Algorithms, Thrashing.	14
IV	Implementing File System: File System Structure, File System Implantation, file operations, Type of Files, Directory Implementation, Allocation Methods, and Free Space Management. Disk Scheduling algorithm- SSTF, Scan, C- Scan, Look, C-Look. SSD Management.	16
Suggested Evaluation Methods		
	Internal Assessment: <ul style="list-style-type: none"> ➤ Theory <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/presentation/assignment/quiz/class test etc.: 15 • Mid-Term Exam: 10 	End Term Examination: A three-hour exam for theory.
Part C-Learning Resources		
	Text Books and Reference Books: <ul style="list-style-type: none"> • Silberschatz A., Galvin P.B., and Gagne G., Operating System Concepts, John Wiley & Sons. • Godbole, A.S., Operating Systems, Tata McGraw-Hill Publishing Company, New Delhi. • Deitel, H.M., Operating Systems, Addison- Wesley Publishing Company, New York. • Tanenbaum, A.S., Operating System- Design and Implementation, Prentice Hall of India, New Delhi.

<u>Instructions for Paper- Setter</u>		
<p>Examiner will set a total of nine questions. Out of which first question will be compulsory. Remaining eight questions will be set from four unit selecting two questions from each unit. Examination will be of three-hour duration. All questions will carry equal marks. First question will comprise of short answer type questions covering entire syllabus.</p> <p>Candidate will have to attempt five questions in all, selecting one question from each unit. First question will be compulsory. Examination will be of three-hour duration.</p>		

Unit	Topics	Contact Hours
I	<p>Overview of C: History, Importance, Structure of C Program, Character Set, Constants and Variables, Identifiers and Keywords, Data Types, Assignment Statement, Symbolic Constant.</p> <p>Input/output: Formatted I/O Function-, Input Functions viz. scanf(), getch(), getche(), getchar(), gets(), output functions viz. printf(), putchar(), puts().</p>	10
II	<p>Operators & Expression: Arithmetic, Relational, Logical, Bitwise, Unary, Assignment, Conditional Operators and Special Operators Operator Hierarchy; Arithmetic Expressions, Evaluation of Arithmetic Expression, Type Casting and Conversion. Decision making with if statement, if-else statement, nested if statement, else-if ladder, switch and break statement, go to statement, Looping Statements: for, while, and do-while loop, jumps in loops.</p>	10
III	<p>Arrays: One Dimensional arrays - Declaration, Initialization and Memory representation; Two Dimensional arrays -Declaration, Initialization and Memory representation. Functions: definition, prototype, function call, passing arguments to a function: call by value; call by reference, recursive functions. Strings: Declaration and Initialization, String I/O, Array of Strings, String Manipulation Functions: String Length, Copy, Compare, Concatenate etc., Search for a Substring.</p>	10
IV	<p>Pointers in C: Declaring and initializing pointers, accessing address and value of variables using pointers; Pointers and Arrays. User defined data types: Structures - Definition, Advantages of Structure, declaring structure variables, accessing structure members, Structure members initialization, Array of Structures; Unions – Union definition; difference between Structure and Union.</p>	10
V*	<p>Practicum: Students are advised to do laboratory/practical practice not limited to, but including the following types of problems:</p> <ul style="list-style-type: none"> • To read radius of a circle and to find area and circumference • To read three numbers and find the biggest of three • To check whether the number is prime or not • To read a number, find the sum of the digits, reverse the number and check it for palindrome • To read numbers from keyboard continuously till the user presses 999 and to find the sum of only positive numbers • To read percentage of marks and to display appropriate message (Demonstration of else-if ladder) • To find the roots of quadratic equation <p>To read marks scored by n students and find the average of marks (Demonstration of single dimensional array)</p> <ul style="list-style-type: none"> • To remove Duplicate Element in a single dimensional Array • To perform addition and subtraction of Matrices • To find factorial of a number 	25

	<ul style="list-style-type: none"> • To generate Fibonacci series • To remove Duplicate Element in a single dimensional Array • To find the length of a string without using built in function • To demonstrate string functions • To read, display and add two m x n matrices using functions • To read a string and to find the number of alphabets, digits, vowels, consonants, spaces and special characters • To Swap Two Numbers using Pointers • To demonstrate student structure to read & display records of n Students 	
	Suggested Evaluation Methods	
	<p>Internal Assessment:</p> <p>➤ Theory</p> <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/presentation/assignment/quiz/class test etc.: 5 <p>□ Mid-Term Exam: 10</p>	<p>End Term Examination: A three-hour exam for both theory and practicum.</p>
	<p>➤ Practicum</p> <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/Demonstration/Viva-voce/Lab records etc.: 5 • Mid-Term Exam: NA 	
	Part C-Learning Resources	
	<p>Recommended Books/e-resources/LMS:</p> <ul style="list-style-type: none"> • Gottfried, Byron S., Programming with C, Tata McGraw Hill. • Balagurusamy, E., Programming in ANSI C, Tata McGraw-Hill. • Jeri R. SEMESTER 4

INDIRA GANDHI UNIVERSITY, MEERPUR, REWARI

Session:2024-25			
Part A-Introduction			
Subject	Computer Applications		
Semester	IV		
Name of the Course	Java OOP Foundations		
Course Code	24 L5.0-CAC-401		
Course Type:(CC/MCC/MDC/CC-M/DSEC/VOC/DSE/PC/AEC/VAC)	CC-4 (Core Course)		
Level of the course (As per Annexure-I)	100-199		
Pre-requisite for the course (if any)	Knowledge of any Computer Programming Language		
Course Learning Outcomes(CLO):	After completing this course, the learner will be able to: 1. Implement simple java programs. 2. Implement multiple inheritance using Interfaces 3. Implement Exception Handling and File Handling. 4. Use AWT to design GUI applications. 5* develop the project using java.		
Credits	Theory	Practicum	Total
	3	1	4
Contact Hours	3	2	5
Max. Marks:100(70(T)+30(P)) Internal Assessment Marks:30(20(T)+10(P)) End Term Exam Marks:70(50(T)+20(P))		Time: 3 Hrs.(T), 3Hrs.(P)	
Part B- Contents of the Course			
<u>Instructions for Paper- Setter</u>			
<p>Examiner will set a total of nine questions. Out of which first question will be compulsory. Remaining eight questions will be set from four unit selecting two questions from each unit. Examination will be of three-hour duration. All questions will carry equal marks. First question will comprise of short answer type questions covering entire syllabus. Candidate will have to attempt five questions in all, selecting one question from each unit. First question will be compulsory. Practicum will be evaluated by an external and an internal examiner. Examination will be of three-hour duration.</p>			

Unit	Topics	Contact Hours
I	Object Oriented Programming and Java Fundamentals: Structure of Java programs, Classes and Objects, Data types, Type Casting, Looping Constructs.	10
II	Interfaces: Interface basics; Defining, implementing and extending interfaces; Implementing multiple inheritance using interfaces Packages: Basics of packages, Creating and accessing packages, System packages, Creating user defined packages	10
III	Exception handling using the main keywords of exception handling: try, catch, throw, throws and finally; Nested try, multiple catch statements, creating user defined exceptions. File Handling Byte Stream, Character Stream, File I/O Basics, File Operations	10
IV	AWT and Event Handling: The AWT class hierarchy, Events, Event sources, Event classes, Event Listeners, Relationship between Event sources and Listeners, Delegation event model, Creating GUI applications using AWT.	10
*	<p>Practicum:</p> <p>Students are advised to do laboratory/practical practice not limited to, but including the following types of problems:</p> <ul style="list-style-type: none"> • WAP to find the sum of 10 numbers, entered as command line arguments. • WAP to find the area of rectangle and circle using Interface. • WAP to implement multiple inheritance. • WAP to show the concept of packages. • WAP to handle the Exception using try and multiple catch blocks and a finally block. • WAP for Implementing Calculator in an Applet, use appropriate Layout Manager. • Write Applet code to add two integers in textbox and their sum should appear in third textbox. • Write AWT program in Java to find the sum, Multiplication and average of three numbers entered in three Text fields by clicking the corresponding Labeled Button. The result should be appearing in fourth text field. • Write Applet code to show all the activities of Mouse using Mouselistener and MouseMotionlistener. • What are various stream classes in Java? Write Java code to read character from a file and write into another file. • What are AWT Classes? Write Java Program to generate Even numbers and Odd Numbers in TextField “T1 and T2 respectively” while pressing Button “Even” and “Odd”. • Write a program to Copy the text from one file to another using byte stream. 	25

Suggested Evaluation Methods	
<p>Internal Assessment:</p> <p>➤ Theory</p> <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/presentation/assignment/quiz/class test etc.: 5 • Mid-Term Exam: 10 <p>➤ Practicum</p> <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/Demonstration/Viva-voce/Lab records etc.: 5 • Mid-Term Exam: NA 	<p>End Term Examination: A three-hour exam for both theory and practicum.</p>
Part C-Learning Resources	
<p>Recommended Books/e-resources/LMS:</p> <ul style="list-style-type: none"> • Schildt, H. (2018). Java: The Complete Reference. 10th edition. McGraw-Hill Education. • Balaguruswamy E. (2014). Programming with JAVA: A Primer. 5th edition. India: McGraw Hill Education • Horstmann, C. S. (2017). Core Java - Vol. I – Fundamentals (Vol. 10). Pearson Education • Schildt, H., & Skrien, D. (2012). Java Fundamentals - A Comprehensive Introduction. India: McGraw Hill Education.

Unit	Topics	Contact Hours
I	Number Systems: Binary, Octal, Hexadecimal etc. Conversions from one number system to another, BCD Number System. BCD Codes: Natural Binary Code, Weighted Code, Self-Complimenting Code, Cyclic Code. Error Detecting and Correcting Codes. Character representations: ASCII, EBCDIC and Unicode. Number Representations: Integer numbers - sign-magnitude, 1's & 2's complement representation. Real Numbers normalized floating point representations.	16
II	Binary Arithmetic: Binary Addition, Binary Subtraction, Binary Multiplication, Binary Division using 1's and 2's Complement representations, Addition and subtraction with BCD representations. Boolean Algebra: Boolean Algebra Postulates, basic Boolean Theorems, Boolean Expressions, Boolean Functions, Truth Tables, Canonical Representation of Boolean Expressions: SOP and POS, Simplification of Boolean Expressions using Boolean Postulates & Theorems, Karnaugh-Maps (upto four variables), Handling Don't Care conditions.	14
III	Logic Gates: Basic Logic Gates – AND, OR, NOT, Universal Gates – NAND, NOR, Other Gates – XOR, XNOR etc. Their symbols, truth tables and Boolean expressions. Combinational Circuits: Design Procedures, Half Adder, Full Adder, Half Subtractor, Full Subtractor, Multiplexers, Demultiplexers, Decoder, Encoder, Comparators, Code Converters.	14
IV	Sequential Circuits: Basic Flip-Flops and their working. Synchronous and Asynchronous Flip-Flops, Triggering of Flip-Flops, Clocked RS, D Type, JK, T type and Master-Slave Flip-Flops. State Table, State Diagram and State Equations. Flip-flops characteristics & Excitation Tables. Sequential Circuits.	16
Suggested Evaluation Methods		
	Internal Assessment: ➤ Theory <ul style="list-style-type: none"> • Class Participation: 5 • Seminar/presentation/assignment/quiz/class test etc.: 15 • Mid-Term Exam: 10 	End Term Examination: A three hour exam for theory.
